PROFESSIONAL SUMMARY

ECE graduate (2026) and aspiring Java Full Stack Developer skilled in Core Java, Spring Boot, APIs and MySQL. Hands-on experience delivering responsive, database-driven web applications and clean CRUD architectures. Seeking an entry-level Software Developer role to build scalable solutions.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering **2022 – Apr. 2026**
Sengunthar Engineering College **Tiruchengode, Tamil Nadu**

TECHNICAL SKILLS

- **Languages:** Java (Core Java, OOPs), JavaScript (ES6+), SQL
- **Backend** Spring Boot, RESTful APIs, JDBC, Hibernate, CRUD Operations
- **Database:** MySQL
- **Web:** HTML, CSS, React.js, Bootstrap
- **Databases & Tools:** MySQL, Git, GitHub, Eclipse, IntelliJ IDEA, VS Code

EXPERIENCE

Besant Technologies **May. 2026 – Present**
(Java Full Stack Development Intern) **Bangalore, India**

- Developed and deployed dynamic web applications using Core Java, JDBC, and Spring Boot for efficient backend processing.
- Engineered relational database schemas optimized and MySQL queries for CRUD operations, improving data retrieval efficiency.
- Designed 8+ responsive, cross-browser compatible user interfaces using HTML5, CSS3, JavaScript, and Bootstrap.
- Utilized Git and GitHub for team version control, code reviews, and structured branch management.

Emglitz Technologies **NOV. 2024 – DEC 2024**
(Intern) **Salem, India**

- Programmed microcontrollers using C to build and test functional embedded system modules.
- Analyzed electronic circuit diagrams and performed hardware debugging to optimize component performance.

PROJECTS

E-Governance Citizen Grievance Management System: | Core Java, OOP, ArrayList, Arrays, IntelliJ IDEA **JUN. 2026**

- Architected a modular Citizen Grievance Management System using Core Java, OOP principles, and Collections such as ArrayList and HashMap for efficient data handling.
- Developed core features including citizen registration, grievance submission, status tracking, and grievance resolution workflows.
- Implemented input validation and exception handling to ensure system reliability, accurate data processing, and a smooth user experience.

SkillBridge – Skill-Based Job Matching Platform : | Java, Spring Boot, MySQL, HTML/CSS, JS, Bootstrap **AUG. 2026**

- Built a full-stack recruitment platform enabling candidates to filter and apply for jobs based on validated skill sets.
- Implemented secure user authentication, role-based profile management, and a dynamic job search filter.
- Designed an optimized MySQL database schema to handle candidate profiles, job listings, and application tracking in real-time.
- Integrated responsive UI designs ensuring seamless performance across mobile and desktop devices.
